Sorry for the late reply,

I do give you permission to modify the route Yard Switching III I have a fix that adds siding names available, if you did not notice.

Good luck with the activites!

Subject : RE: Yard 3 Route for Activity Generator

Hi Max,

I've been working with Norm Beveridge on a few templates for Activity Generator by Skyline Computing. The route Yard 3 needs to have some modification done to it before we can use Activity Generator to create activities. It will need to have some siding markers and the switches look as though they need to be converted to manual ones. I believe Norm had already sent you an email, regarding Yard 1 and Yard 2, detailing what needed to be done. I have already done that to my route, but would like permission to post these along with the AG files so others may switch the yard. I've included the files that I have modified in case you would like to take a look.

Regards,

Jim
