

Track Diagram For
MSTs Route By Patrick Wise

ATSF CAJON PASS

ENHANCED FOR SKYLINE COMPUTING'S ACTIVITY GENERATOR
BY JIM MEINDL AND DON KLAEBEL.

Diagram by Craig Kawahara

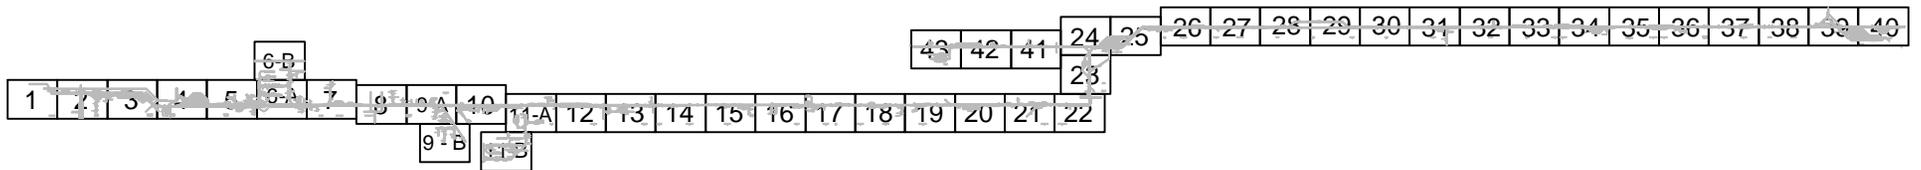

The track diagrams contain references to two differing milepost markers. The referenced mileposts under the station names are from the original route as created by Patrick Wise. The milepost values shown across the top or bottom edge of each page are from the Activity Generator enhancement version.

When printing the track diagrams, the page references denote the following layout:
 Mileposts are for reference only, and are not to scale.

INDEX: some entries contain "(OCC)" after the entry. This denotes tracks that are "occupied" by railcars placed by the route's author as eye candy.
